

To estimate how much you'd pay in the future:

Locate your assessed property value. Divide it by \$1,000.

Next, multiply this amount by the estimated tax rate.

Example:

*\$200,000 assessed property value / \$1,000 x \$3.30 estimated tax rate =
\$55 per month (\$660 annual)*

In 2016, the taxpayer paid \$53.33 per month and \$640 per year.

2018 Home Value (<i>\$3.30 per \$1,000 Value</i>)	Est. Rate Per Month (<i>\$3.30 per \$1,000 Value</i>)	Est. Rate Per Year
150,000	41	495
200,000	55	660
250,000	69	825
300,000	83	990
